## SUMMARY

I have over 10 years of experience as Mobile and Web developer. I have mastered many of mobile and web programming skills and have ability to complete a multitude of project types with professionalism that will exceed your expectations.

I am passionate about challenging high level opportunities and love to work with you to help you manifest your visions in the most realistic ways possible.

## EDUCATION

**Belarusian State Technological University**

1991-1994

Bachelor of Computer Science

## TECHNICAL SKILLS

### ► iOS

Working with Objective-C, Swift or SwiftUI on XCode 10+

Experiences with advanced iOS technologies including Core Data, Map Kit, Constraint Auto Layout, Alamofire / SwiftyJSON / Realm API chain, Social Auth / Share, RxSwift, Voip Call, Push Notification, Socket.io / Firebase chat and so on

### ► Android

Working with Java or Kotlin on Android Studio

Excellent in Java, Object Oriented Design, and REST API, well experienced with Fragments, RxJava, Retrofit / Gson / Realm API chain, Social Auth / Share, Google Map, GeoLocation, Firebase, Push Notification, Socket.io / Firebase chat and so on.

### ► React Native

Working with Javascript or Typescript for both iOS and Android platform.

Strong with redux and redux-saga, most used common modules such as react-navigation, react-

native-elements, react-native-maps, redux-persist, react-native-community, axios, moment, lodash, luxon and so on .

► **NodeJs**

Working with Javascript or Typescript in ExpressJs back-end.

Usually used passport and jsonwebtoken for authentication, sequelize for ORM, redis for cache, joi for validation, nodemailer for smtp and so on.

Also using dotenv, moment, lodash, luxon, crypto and cors library as default on development.

Additionally experienced with graphql, socket.io for chat, social auth APIs

Using MySQL or Postgresql database on Ubuntu OS, and often host to AWS EC2 instance **React.js**

Working with Javascript or Typescript in web front-end projects.

Strong with redux and redux-saga, most used common modules such as react-router, react-router-dom, redux-persist, react-native-community, axios, moment, lodash, luxon...

And well experienced with Material UI, Bootstrap, React Admin, chart libraries.

## WORKING EXPERIENCES

### **Mobile Developer, ECG LLC**

**(Las Vegas, USA - Remote Contract)**

Oct 2016 – Dec 2019

Have developed many of mobile apps using Swift / Android native codes.

It was great opportunity to get lots of experiences in mobile development with long term relationship.

### **React Developer, YelliApp Inc**

**(Washington, USA - Remote Contract)**

Mar 2020 – Jun 2020

Have worked on React projects for both of React Native and React.js, had built entire project including all of web backend / frontend and mobile apps with Node.js and React. The project timeline was short and fast as well.

### **Full Stack Developer, Milkyway Global**

**(New York, USA - Remote Contract)**

Apr 2019 – Jun 2020

Mostly working on 2019 in this company to build a social media platform called Journile.

During that my skills grow up more, I have been experienced in Node.js / postgresql back-end, React.js front-end and React Native mobile development.

I used passport and jsonwebtoken for authentication, sequelize for ORM, redis for cache, joi for validation, nodemailer for smtp and so on.

Also using dotenv, moment, lodash, crypto and cors library as default on developing.

**Lead Developer, EnjoyTech USA**

**(New York, USA - Remote Contract)**

Jul 2020 – Sep 2020

Have worked on lead developer role, directly developed back-end and iOS apps. I have managed several projects simultaneously with 3 other developers and especially have got an opportunity to work in health app development.

**React Native Developer, Lovebug LLC**

**(Florida, USA - Remote Contract)**

Jan 2021 – April 2021

Have worked on React Native project in part-time contract. Have got good experience using firebase API in React. The project was designed as well to be able to manage both of development and prod builds inside one project.

**Mobile Engineer && Python Back-end Developer, Kung FuTea**

**(Paxinos, USA - Remote Contract)**

Nov 2020 – April 2021

Working on Enhancement several Django back-end projects. It was good challenge on python programming as well as Django rest framework in my skill building.

**Full stack Mobile / Back-end Developer, Courial**

**(Los Angeles, USA - Remote Contract)**

April 2021 – Present

Working on delivery app projects called Courial. Built backend with Django, and have both of iOS / Android mobile apps (There are separated user and partner apps).

**LANGUAGES**

English (Intermediate)
